# CAROOD WATERSHED

a regional convergence initiative

# ABOUT CAROOD WATERSHED

Carood Watershed Model Forest (CWMF) program is a Convergence Initiative lead by the Department of Agriculture (DA), Department of Environment and Natural Resources (DENR), Department of Agrarian Reform (DAR) and Department of Interior and Local Government (DILG). The watershed is the 5th largest watershed in the Province of Bohol. It has an area of 25,405.79 hectares covering the Municipalities of Ubay, Alicia, Pilar, Mabini, Candijay, Guindulman, Anda, Duero, Sierra Bullones and San Miguel with a total of 73 barangays within the watershed. There are three (3) land classification; timberland with 7,192.02 hectares (28%), Alienable and Disposable-17,038.28 hectares (67%) and Military Reservation - 1,175.49 hectares (5%)

CWMF is the 52nd member of the International Model Forest Network (IMFN). IMFN is a non-government organization whose members and supporters work toward for the common goal of the sustainable management of forest-based landscapes, through the Model Forest on a flexible approach to landscape, and ecosystem management that combines the social, environmental and economic needs of local communities with the long-term sustainability of large landscapes in which forests is an important feature.

Carood Watershed Model Forest is managed by the Carood Watershed Model Forest Management Council, Incorporated (CWMFMCI). CWMFMCI is an inter-LGU, multi- agency, multi-sectoral consortium working to ensure effective and sustainable resource management with a holistic watershed approach while balancing the development needs of local communities.

# VISION MISSION GOALS

## VISION

In 2025, Carood Watershed will be ecologically balanced and sustainably managed by committed stakeholders

## MISSION

To fully implement various programs, projects and activities by strengthening partnership among stakeholders and improve bio-physical and socio-economic condition of the people in Carood Watershed.

## GOALS

1. Strengthened and sustained partnership among stakeholders.
2. Improved ecological conditions of the watershed.
3. Sustained, sufficient and good quality supply of water
4. Development of upland, lowland and coastal livelihood and enterprise.
5. Increased preparedness and resilience to climate change
6. Good governance and efficient use of resources
7. Efficient solid waste management
8. Conservation, protection and development of key areas potential for ecotourism
